# VISUALIZATION TOOL FOR VEHICLE CHARGE AND RANGE ELECTRIC ANALYSIS.

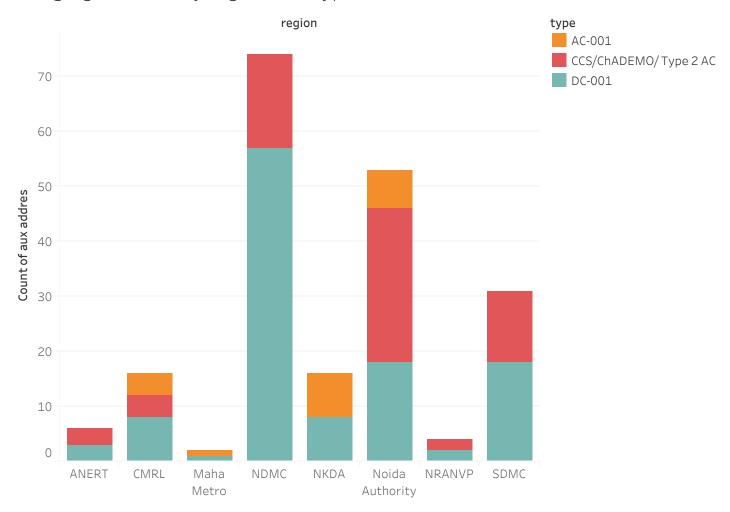

#### PROJECT DESCRIPTION:

A vehicle that can be powered by an electric motor that draws electricity from a battery and is capable of being charged from an external source and have an electric motor instead of an internal combustion engine.

The Electric Vehicle (EV) is not new, but it has been receiving significantly more attention in recent years. Advances in both EV analytics and battery technologies have led to increased automotive market share. However, this growth is not attributed to hardware alone. The modern mechatronic vehicle marries electrical storage and propulsion systems with electronic sensors, controls, and actuators, integrated closely with software, secure data transfer, and data analysis, to form a comprehensive transportation solution. Advances in all these areas have contributed to the overall rise of EV's, but the common thread that runs through all these elements is data analytics.

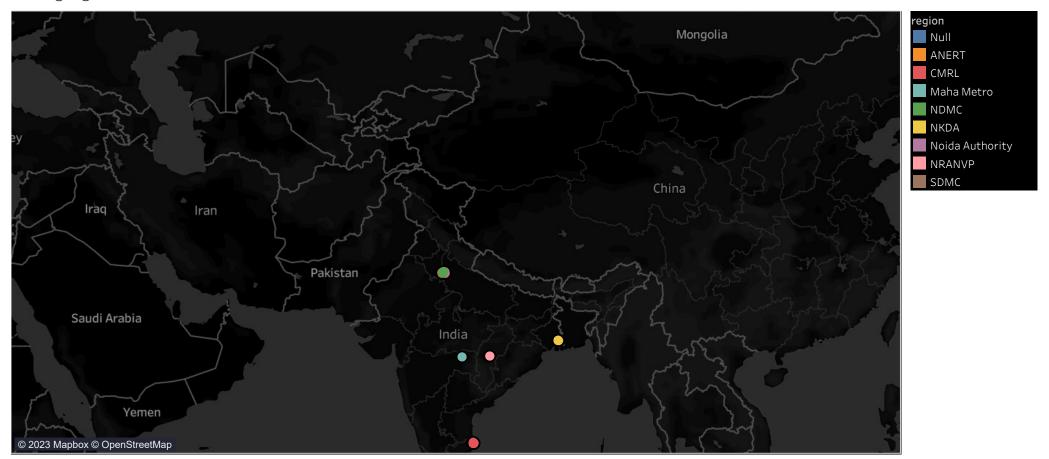

The new EV's are combined Electrical storage and propulsion systems with electronic sensors, controls, and actuators, integrated closely with software, secure data transfer to form a comprehensive transportation solution.

#### charging stations by region and type in india

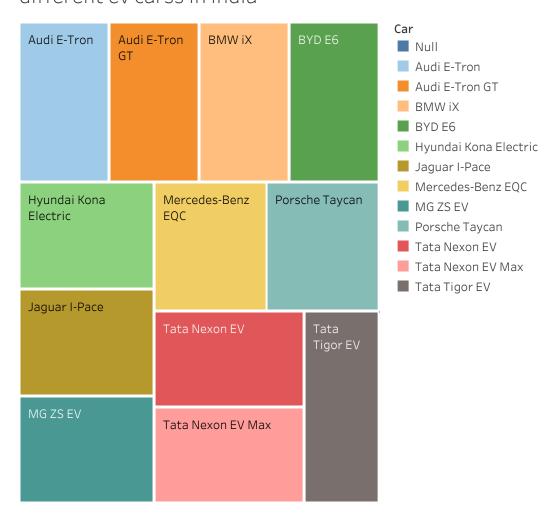

Count of aux addres for each region. Color shows details about type. The view is filtered on region, which excludes Null.

#### Charging station in india

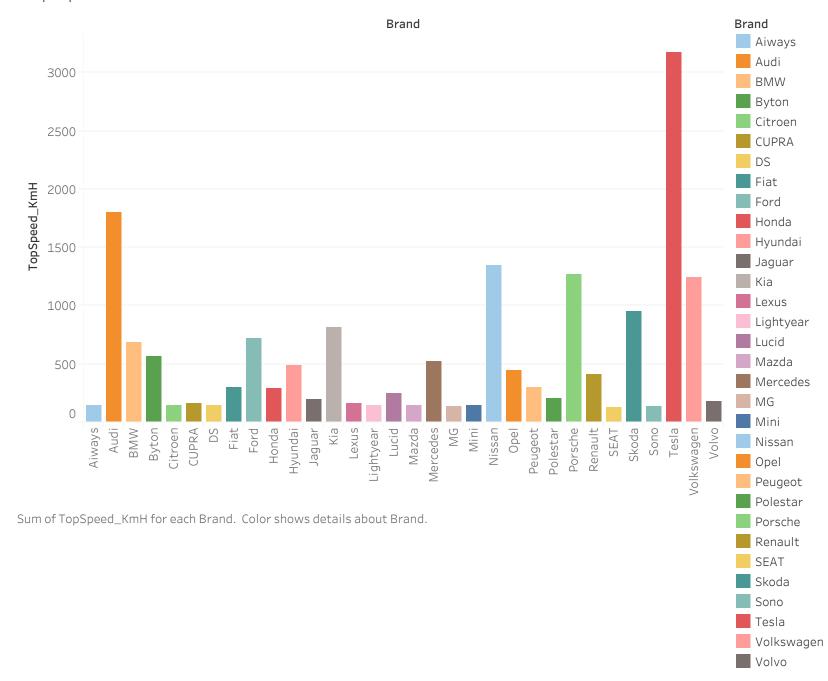

Map based on average of longitude and latitude. Color shows details about region. Details are shown for address and power.

#### different ev carss in india

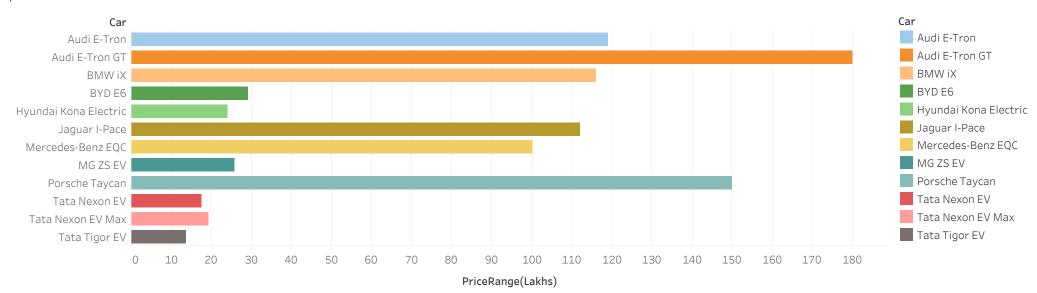

Car. Color shows details about Car. Size shows count of Style. The marks are labeled by Car. Details are shown for various dimensions.

#### top speed for different brands

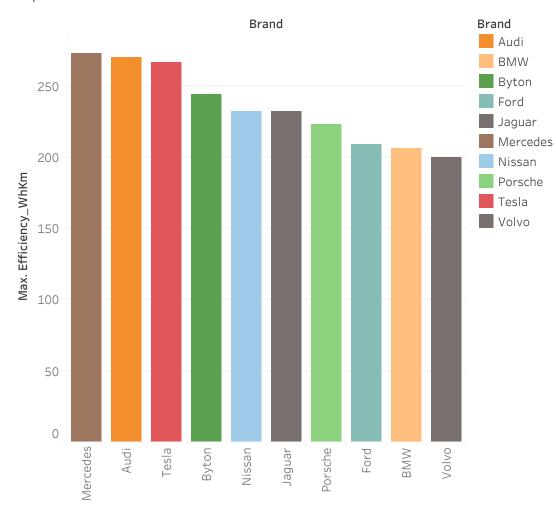

#### price for different cars in india

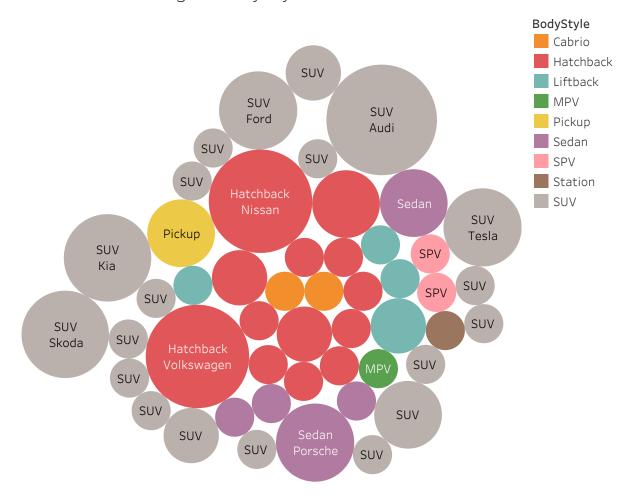

Sum of PriceRange(Lakhs) for each Car. Color shows details about Car. The view is filtered on Car, which excludes Null.

#### top 10 most efficient ev brands

Maximum of Efficiency\_WhKm for each Brand. Color shows details about Brand. The view is filtered on Brand, which has multiple members selected.

#### brands according to bodystyle

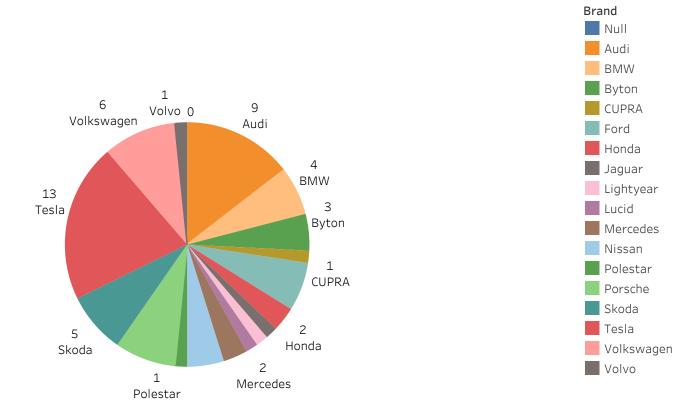

BodyStyle and Brand. Color shows details about BodyStyle. Size shows body style\_count. The marks are labeled by BodyStyle and Brand. The view is filtered on BodyStyle, which excludes Null.

### brand filtered by powertrain type

Tata	BMW	BYD		Hyundai		Count of Car
Audi	Jaguar		Mercedes-Benz		Porsche	
	MG					

Car\_brands\_india. Color shows count of Car. Size shows count of Car. The marks are labeled by car\_brands\_india.

Count\_powertrain and Brand. Color shows details about Brand. The marks are labeled by count\_powertrain and Brand. The data is filtered on PowerTrain, which excludes FWD.

no of models by each brand

Count\_powertrain and Brand. Color shows details about Brand. The marks are labeled by count\_powertrain and Brand. The data is filtered on PowerTrain, which excludes FWD.
